

RENEWING YOUR MEDICARE PLAN

You do not need to renew your Medicare coverage; however it is still a good idea to review your coverage annually. This is true for original Medicare, Prescription Drug plans, and Medicare Advantage Plans. As long as you keep paying your premiums then your coverage will renew itself every year. There are 4 circumstances though as to why your plan will not renew; they are:

- Medicare terminated the contract with your plan
- During the year your plan leaves the Medicare program
- Your plan changed its service area and you now live outside coverage
- Your plan decides not to renew its Medicare contract

As your health needs change year over year, you may decide you want less or more coverage than what your plan is currently providing you. Contact one of our agents to see what can be done to help you and make sure you are maintaining the best coverage possible.
